

Conformity Declaration

(by ISO/IEC 17050-1, August 2010)

Name of issuer: EQUA Simulation AB
Address of issuer: Råsundavägen 100
169 57 Solna
Sweden
Object of the declaration: VDI 2078 Extension for IDA ESBO, Version 2.3 and higher

The object of the declaration described above is in conformity with the requirements of the following documents:

**VDI 2078: Calculation of thermal loads and ambient temperatures
(design cooling load and annual simulation)
July 2015**

Additional information:

The issuer confirms that the above mentioned software has been validated according to VDI 2078 section 9 by means of the following benchmarks. Moreover, the issuer provides the benchmark files in a manner allowing to re-calculate the results.

Validation case B: Validation of a program with a different computational core than the one in VDI 6007 Part 1 and/or a different radiation model than the one in VDI 6007 Part 3.

All of the validation cases that are supported by the VDI 2078 Extension for IDA ESBO, Version 2.3 and higher have been passed. More details about the scope of the software with respect to VDI 2078 are provided in user documentation.

Signed for and on behalf of:
EQUA Simulation AB
