Mobility  
goes  
Additive

# Mobility goes Additive - The VDI Students Competition

- March 2020, Berlin
- International and interdisciplinary competition for students on 3D printing
- 3 days, bringing together student teams from different universities and different scientific backgrounds
- Focus on interdisciplinary and cross-sectorial potentials of additive manufacturing in connection with the opportunities and challenges of digitization in the field of mobility
- Learn about theory and practice of solving complex problems
- Be one of the best three teams to be awarded with valuable prizes
- Meet the key players of the industry: students and companies will get in touch
