

SEPARATING DOMESTIC WASTE

WITH MR. GYLBY

Thanks go to AWISTA in Düsseldorf for giving us the lists. Pin it!

There is some **waste** that just doesn't belong in a **plastics recycling plant**. But you still find things in nearly every bag, **dustbin** and container that are in the wrong place. This includes **packaging** made from other materials or **synthetic materials** which are actually not packaging. Mr. Gylby has still got some waste that he is not quite sure what to do with. Which bin do they go in? Sort the waste into either the yellow **bin** or the general waste bin. You can **cover up** the lists and then colour in the circles next to the **items** either yellow or grey. Or you look for the German word that **matches** the English **translation** and write the number in the circle. The **drawings** only help you a little bit.

- 1 Deckel aus Aluminium
- 2 Deckel aus Blech
- 3 Deckel aus Kunststoff
- 4 Joghurtbecher
- 5 Tüten und Beutel aus Kunststoff
- 6 Eisverpackungen
- 7 Konservendosen
- 8 Kronkorken
- 9 Schalen aus Kunststoff
